

GDELS - Steyr | Support for various development topics

Reference Project

Description

Collaborates with GDELS - Steyr on development activities across multiple engineering disciplines.

- Complete vehicle testing
 - Function and durability testing on ECS proving ground
 - Homologation tests
 - Road Load Data – measurement
- Powertrain efficiency improvement
 - Design / development
 - Analytical calculation
 - FEA calculation
 - Engineering support for manufacturing
- Hybridization feasibility study
 - Assessment different system architectures
 - Pre-Component Specification
 - Supplier List & Evaluation Matrix
 - EE / Vehicle Architecture Concept
 - DMU Study
